1. Restriction to one of the following inventions is required under 35 U.S.C.

121:

I. Claims 1-16, drawn to a method, classified in class 166, subclass

293.

II. Claims 17-35, drawn to a composition, classified in class 507,

subclass 219.

2. The inventions are distinct, each from the other because of the following

reasons:

Inventions I and II are related as product and process of use. The

inventions can be shown to be distinct if either or both of the following can be

shown: (1) the process for using the product as claimed can be practiced with

another materially different product or (2) the product as claimed can be used in

a materially different process of using that product. See MPEP § 806.05(h). In

the instant case, the sealant could be used as a thickener in a painting or coating

formulation.

3. Because these inventions are independent or distinct for the reasons

given above and have acquired a separate status in the art in view of their

different classification, restriction for examination purposes as indicated is

proper.

Application/Control Number: 10/827,022

encompassing the elected invention.

Art Unit: 3672

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims

Page 3

- 5. The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
- 6. Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
- 7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship

Art Unit: 3672

must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nicole Coy whose telephone number is 571-272-5405. The examiner can normally be reached on M-F 7:30-5:00, 1st F off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Bagnell can be reached on 571-272-6999. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
